PERSONAL PROFILE

Flutter Developer with 2 years of experience creating high-quality, responsive mobile apps. Fluent in **GetX**, with solid practical knowledge of **Provider** and **Bloc** for state management. Strong foundation in Computer Science, with a focus on clean **UI/UX design**, scalable architecture, and maintainable code. Experienced in using **AI tools** to accelerate development and enhance code quality.

Education

SIMAT, Kerala Technical University
B.Tech in Computer Science

2019 – 2023

- CGPA: 7.2
- **Location:** Vavanoor, Palakkad dist, Kerala

Experience

Junior Software Engineer
ATeam Soft Solutions

Trivandrum, India
August 2024 – Present

- Delivered high-quality Flutter apps using clean, maintainable code and modern architectures.
- Utilised GraphQL for efficient API integration and improved app performance.
- Participated in full software lifecycle — from requirement gathering to deployment.
- Contributed to code reviews, team discussions, and agile development practices.
- Worked on key projects including *PiggyBack*, *LeadsDen*, *My Property Journey* (sub-app of LeadsDen), and *Fintalkr*.

Flutter Developer
Coderspace

Trivandrum, India
July 2023 – July 2024

- Built a strong foundation in Flutter, focusing on mobile app development.
- Gained expertise in state management using **GetX** and **Provider**.
- Applied learned skills to real-time projects such as *Tanq Driver* and *Tanq Rider*.
- Contributed to app development, UI/UX improvements, and integration of backend services.

Publications

MedApp: An Application For Patient's Personal Medical History Maintenance

ICIET 2023

Projects

Piggyback Sports

2024

- A sports bet tracking app allowing users to manage real or hypothetical bets, similar to a stock portfolio tracker.
- Built using Flutter with Provider for state management, GraphQL for APIs, and Firebase for chat functionality.
- Available on:
 - [Play Store](#) [🔗](#)
 - [App Store](#) [🔗](#)

- Leadsden**
2024

 - Large-scale CRM application for real estate data and agent management.
 - Built with Flutter using Bloc for state management and REST APIs; integrates with REX and Agentbox CRMs.
 - Collaborated in a team of 3 Flutter developers; project 60% completed.
- My Property Journey**
2024

 - A support app for Leadsden used by real estate agents for daily operations.
 - Built using Flutter and GetX for state management; project currently 50% complete.
- Budget Bee: Money Management Application**
2023

 - Developed a cross-platform Flutter app for intuitive personal finance management.
 - Focused on clean UI/UX, efficient data handling, and Agile methodology.
 - [Play Store Link](#) 
- Knack: E-Learning Platform**
2023

 - Designed using MVVM, Domain-Driven Design (DDD), and BLoC for state management.
 - Built as a responsive Flutter web app with Firebase for authentication and real-time sync.
 - Significantly improved development speed and user experience.
